

## Quality Officer

- **Leading Australian owned heating & cooling manufacturer**
- **Permanent, full-time opportunity**
- **Northern Suburbs**

Climate Technologies are one of Australia's leading manufacturers of residential and commercial heating and cooling appliances and commercial air distribution products. With highly regarded brands such as Bonaire, Pyrox, Celair and Climate Technologies Chilled Beams the product list is extensive and impressive.

### **The Role**

Reporting to the Site Operations Manager, this hands-on role will see you responsible for planning, coordinating and directing a quality control program designed to ensure continuous production of products consistent with established standards.

### **Key Responsibilities**

- Monitoring appraising, advising and implementing quality related activities
- Managing the maintenance, development and certification of the quality management system in accordance with ISO9001
- Managing and actively seeking continuous improvement from Production
- Assist with training personnel towards SOPs
- Maintain and improve the RMW and warranty process
- Management of document control and database management

### **Your Profile**

- Diploma or similar in Quality or Engineering
- Experience with continuous improvement, lean initiatives and quality procedures
- An understanding of quality management systems including ISO 9001
- Experience in document control and database management
- High level people skills
- Adaptable to changing workloads and priorities
- Sound communication skills – written and verbal
- Experience with MS Office

Apply now for a role that will challenge and excite in its variety, and offers an attractive package for the right candidate.

Applications should include a covering letter identifying particularly relevant skills and experiences, will be treated confidentially and should be directed [hr@climtech.com.au](mailto:hr@climtech.com.au)
